PASSED AUDITS (19)

Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

NAMES AND LABELS

<div><div></div>Image elements do not have <code>[alt]</code> attributes</div>	▼
<div><div></div>Document doesn't have a <code><title></code> element</div>	▼
<div><div></div>Form elements do not have associated labels</div>	▼
<div><div></div>Links do not have a discernible name</div>	▼

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

<div><div></div>Background and foreground colors do not have a sufficient contrast ratio.</div>	▼
---	---

These are opportunities to improve the legibility of your content.

INTERNATIONALIZATION AND LOCALIZATION

▲

<html> element does not have a [lang] attribute

▼

These are opportunities to improve the interpretation of your content by users in different locales.

NAVIGATION

▲

Heading elements are not in a sequentially-descending order

▼

These are opportunities to improve keyboard navigation in your application.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

CONTENT BEST PRACTICES

- ▲ Document doesn't have a <title> element
- ▲ Document does not have a meta description
- ▲ Image elements do not have [alt] attributes

Format your HTML in a way that enables crawlers to better understand your app’s content.
